Dear Future Client,

In 1975, Jimmy Chung, a young and determined engineer, developed an innovative biodegradable surfactant that BASF later certified to become the standard that freed the environment of the toxic effect soaps and detergents at the time had on the environment around the world.

With this came the history of a company first named MECA after the first letters of his young wife's name & partners. He started selling chemicals and raw materials to the Philippine market that included Fragrances after introducing high quality Luzi scents. So popular and effective was his innovative approach that the effects can now be seen in 2005 with over 80% of the Philippine market, irregardless of income bracket, having one of our products in their home. With client's, large and small, meeting ever more stringent export rules and foreign finished goods regulations, it's no wonder that we are preferred 9 out of 10 when meeting clients' needs.

Today as Swiss Fragrances we provide the finest fragrances in the world. Our presence in the Philippines and now the United States, Canada and Mexico will allow you the opportunity to move your brands into other regions of the world.

Stringent Philippine BFAD, North American FDA rules and E.U European Commission (EC) rules, when incorrectly followed, can finish a company's product development run. We have personally seen many Philippine companies no longer allowed into the profitable US and EU markets because competitors misled them into what was acceptable.

How can we help - We understand the desire to bring quality products not only regionally but one day to export your goods. We have been providing services in the form of raw materials and finished goods to our clients in Hong Kong, The U.S, Canada, Taiwan, Europe, UAE and South American, to name a few, long enough to know what sells. This experience allows us to deliver your goods on time and to their destination by sea or air at the most affordable price. We will coordinate with you to make your just-in-time ordering program save you money.

It is remarkable to see the efforts we place on personalized service to our customers. We enable our customers, for instance, to change the appearance, image and functionality of everything from product packaging to hypoallergenic fragrances

Trust Swiss Fragrances to help you not just make goods, but deliver quality products to your customers

Sincerely,

John A. Chung
CEO
Swiss Fragrances, Inc - Asia
